TECHNICAL EXPERIENCE

TCS | SoftwareDeveloper | Present

Aug 2025 — Present
Kolkata, India

Project: Virgin Media O2 – Booking Move / Movers Journey

Working on the migration of the Booking Move / Movers Journey from Angular to Next.js, modernizing the customer-facing journey and improving the frontend architecture and user experience.

- Developing and migrating UI components from Angular to Next.js using React and TypeScript.
- Implementing responsive and reusable frontend components for the customer journey.
- Integrating frontend applications with backend APIs and handling data-driven workflows.
- Working with Storyblok CMS for content-driven UI development.
- Writing and maintaining unit tests using Vitest/Jest and supporting application quality.
- Using Git/GitLab for version control, code reviews, and CI/CD workflows.

Project: LibertyGlobal– ART

- ART is a role-based administrative dashboard designed with four distinct user roles: Preparer, Reviewer, Admin, and Director. It provides secure access control, streamlined workflows, and efficient management of operational activities based on user permissions.
